

## **Stupid vs Hazing: How to tell if something is Stupid, Hazing, or BOTH.**

### Session Facilitator:

Sam Centellas, Sigma Lambda Beta  
Executive Director, La Casa de Amistad

### Description:

Everything is hazing right? Nope.

Something's are stupid, something's are hazing and something's are both. Surprisingly something's are just stupid and not hazing, but can still get you in trouble...

We all know stupid when we see it, but your state hazing law is probably hard to understand. Your school hazing policy is 18 sections of student code referencing other sections of code you don't understand! So how do you tell the difference?

This program cuts through the bull and defines stupid, explains your laws and policies and helps you understand hazing from a different perspective... the common sense one! So come and learn how to understand stupid and hazing and help your group grow.

### AV Equipment:

Screen. I will provide a projector and laptop.

### Room Set-Up:

Lecture Style

### Target Audience:

College students. Program can be targeted towards Greeks or Athletes.
